Master of
***Sustainability and
Environmental Sciences***
(Joint Degree)

PROGRAMME DESCRIPTION

This programme is the Joint Master's Degree programme that develops experts who contribute to solve the complicated global issues, especially in tropical Asia by sustainable and environmental sciences, through the jointly supervised system that takes advantages of the strength of two universities, Malaysia – Japan International Institute of Technology (1 year) and University of Tsukuba, Japan (1 year). Research will be conducted under joint supervision by the two universities.

Graduated student will be awarded with degree from both universities.
